

LUCKY 888 AUTOWORKS, INC.

COMPANY BRIEF HISTORY

Lucky 888 Bus Builders, Inc. started its humble beginning on September 2010. Its first major activity was trading and selling automotive paints, bus trimming and accessories. The company ventured into bus body fabrication and bus body rebuilding; it was a successful shift of activities. In a short period of one year, a well-earned professional reputation was established. The company has evolved from retailing to a one-stop shop offering a wider array of products and services such as rehabilitation of bus units at a lower cost, which is completed within 30-45 working days, reducing time thereby increasing availability for revenue generation. Rehabilitation jobs cover bus body, chassis and engine. An existing old bus that went under high quality rehabilitation job from Lucky 888 will have a brand-new look making it road worthy and safe, reliable and in efficient condition.

Last November 16, 2006, the Department of Trade and Industry, Land Transportation Office and the Bureau of Customs signed a memorandum of agreement on implementing DTI/ Department Administrative Order (DAO) No. 8 series of 2003 otherwise known as the “ Guidelines For Mandatory Accreditation of Rebuilding Centers”, whose primary goal is to assure the public that all rebuilt trucks/buses are done in accordance with the relevant standards and therefore safe, road worthy and has met the standards on exhaust emission.

Also included in said MOA is the directive that the Land Transportation Office, in its campaign against the registration of unworthy vehicles whose parts and components are of dubious origin, should accept registrations at current year model only those trucks/buses rebuilt by DTI-Accredited truck/bus rebuilding centers.

With these achievements we at LUCKY 888 Bus Builder decided to file our application to the Department of Trade and Industry to grant us and be a DTI accredited truck/bus rebuilding center.

Last semester of 2010 we have signed an agreement with a China company to assemble, manufacture and market China Bus equipped with Hino Brand new engine and initially 4 units were imported.

With the foregoing developments, Lucky 888 Bus Builders, Inc. has now turned into a full pledged manufacturer of complete quality bus (brand-new/rebuilt). Our products are equipped with brand new reconditioned engine and transmission, brand new bus body, brand new or a fully rebuilt chassis done by our professional staff and highly-trained mechanics, technicians, and production staff, making it a roadworthy and worry-free bus/truck unit.

Lucky 888 Bus Builder is continuously improving and growing. We always stand by our commitment “ QUALITY SERVICE GUARANTEED” by providing customers with quality products and services.
